Context

- Many manufacturers with proprietary solutions;
  - Incompatibilities between each others;
  - Very expensive;
  - Not suitable to patients.
- There are free software alternatives but
  - Often exclusive to one platform;
  - Uncertified (FDA);
  - Non user-friendly.

MediVisu

MediVisu ambitions to be:

- Able to read all DICOM fields
- Free and will remain as such: a foundation will manage rigths
- Lightweight and easy to apprehend (user-friendly)
- Customizable with profiles management system and presets for each specialization
- Multi-platform (Windows, Mac OS X, GnuLinux at least)
- Certified for medical diagnosis (FDA approved & CE labeled)
- Focused on the user experience
- AGPL license
